

Love At First Sight

The moment I set eyes on you I knew right from the start
I just couldn't help myself ,your playing with my heart
And as we danced together we held each other tight
One of those where moments when everything felt right

The first kiss that you gave me was sweet,kind and wild
The feelings I keep inside my heart began to come alive
With your tender touch and loving care sets a magic night
No wonder people call it love at first sight

Chorus:

**Was it love at first sight when i met you
Oh i hope that my dreams they will come true
As we danced laughed and talked until the morning light
I guess it was love at first sight**

I remember that night you said you loved me
And hope we'd stay together for all internity
You know i have a place here in this heart of mine
Where your love will remain until the end of time

Chorus:

9 Bar Solo + Key Change

With time passing quickly our love grew strong and true
Nothing mattered in this world half as much as you
I just can't believe how we met on that night
Now I really know it was love at first sight

Chorus: x 2

**As we danced laughed and talked until the morning light
I guess it was love at first sight**
