

The Nearest To Perfect

Intro

Oh I never will forget, the first time that we met
When I looked in your two eyes so blue
When I saw you standing there, smiling lips and golden hair
I knew that my dreams had all come true

When I asked you for a date, and I saw you hesitate
I thought my whole world was tumbling down
But whenever you said yes, I knew I'd found true love at last
For you're the nearest to perfect I've found

Chorus

When I wake up every morn
Beside your body soft and warm
I thank the Lord for all the blessings He sent down
And when my long day's work is through
I will hurry home to you
For you're the nearest to perfect I've found

Instrumental

Key Change

On the day you were my bride, tears of happiness I cried
As the road of married life we started down
And on that fine September morn, when our baby girl was born
She was the nearest to perfect I've found

Now our children are all grown, very soon they'll all leave home
Their Mum and I will be left here on our own
If God calls me first to go, remember I still love you so
For you're the nearest to perfect I've found

Chorus

When I wake up every morn
Beside your body soft and warm
I thank the Lord for all the blessings He sent down
And when my long day's work is through
I will hurry home to you
For you're the nearest to perfect I've found
You're the nearest to perfect I've found
